-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed May 16, 2002 and January 29, 2003 complies with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. It has been placed in the application file, the examiner's initials have been provided for each citation, the document has been signed and dated, and the information referred to therein has been considered as to the merits.

### ***Claim Objections***

2. Claim 6 is objected to because of the following informalities: line 14, applicant should replace "functin" with "function". Appropriate correction is required.

### ***Specification***

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of **50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "**means**" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Art Unit: 3736

The applicant has over 200 words in the abstract and uses “means” in five instances.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Weisner et al. US Patent Number 5,262,944 A.

Claim 1. A method of displaying vital signs for use with a bedside monitor, comprising the steps of:

simultaneously displaying parameter values of a plurality of sets of vital signs measured for a plurality of patients respectively; (figure 3 and 4) and

displaying alarm information in a parameter display area or an alarm display area when vital signs relevant to the parameters are in a state where an alarm is to be generated. (76 alarm)

Claim 2. A method of displaying vital signs for use with a bedside monitor, comprising the steps of:

simultaneously displaying parameter values of a plurality of sets of vital signs measured for a plurality of patients respectively; (figure 3 and 4)

displaying alarm information in a parameter display area when vital signs relevant to the parameters are in a state where an alarm is to be generated; (76 alarm) and

Art Unit: 3736

displaying prioritized alarm information from among alarm information pertaining to parameters of the plurality of vital signs in an alarm display area for each patient (column 5, lines 49-67, column 6, lines 1-67, and column 7, lines 1-66).

***Allowable Subject Matter***

6. Claims 3-5 and 7-8 are allowed over the prior art because no art by itself or in combination discloses a “display changeover means” as claimed in each of claims 3-5, 7-8. Additionally, once objection is obviated over by the examiner suggestion or other manner claim 6 is allowable for the same reasons as claims 3-5 and 7-8.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C Astorino whose telephone number is 703-306-9067. The examiner can normally be reached on Monday-Friday, 10:00AM to 4:00PM.
